## Experience

1st May, 2022 - 31st May, 2022

LetsGrowMore

### Summer intern as a React developer

- Developed mini projects, including a To-do list, registration page (MongoDB Atlas integration), and a calculator, showcasing proficiency in ReactJS.
- Built a portfolio website utilizing advanced concepts of routing and hooks, resulting in a user-friendly and responsive web application.
- Contributed to the development of a Tinder clone, implementing the MERN stack for seamless user interactions and data management.

17th Jan, 2023 - 28th July, 2023

Tecunike private limited, Vadodara

### Java Software Developer Intern

- Collaborating on the development of an Applicant Tracking System using Spring Boot and Angular, encompassing backend functionality, database management, and API integration.
- Creating a user-friendly interface in Angular, enhancing usability, and conducting comprehensive testing to ensure application stability.
- Promoting code quality through active participation in reviews, staying updated on industry best practices, and collaborating with cross-functional teams to meet requirements.

1st Nov, 2023 - present

Kode Creators Pvt. Ltd., Vadodara

### Laravel Developer

- Experienced Laravel developer specializing in client-based projects, proficient in PHP, MVC architecture, and database management.
- Demonstrated expertise in backend development, API integrations, and delivering high-quality, scalable solutions for clients.

## Projects

### Inventory Management System

- Developing a MEAN stack Inventory Management System with RESTful APIs, emphasizing role-based access control and JWT authentication.
- Designed a user-friendly Angular frontend with billing, client, and product management features, along with dynamic dashboards and reports.
- Implemented robust security measures, including data validation, encryption, and comprehensive documentation for ease of use.
- Features include billing, timely notifications via email, management of stocks of items, management of clients and many more
